

UFCF6Y-30-3 Assignment Marking Template

Team Name:

Marking Scheme

Documentation

It is assumed that a single person will be responsible for writing each document but that input will be provided from the other team members via document reviews and meetings. Students can get marks for authoring the document, reviewing the document and attending the relevant meetings, all of which need to be documented. Authoring a document can earn up to 18 marks, reviewing a document up to 2 marks and attending the relevant meeting up to 1 mark. Where documents are co-authored the marks will be evenly split between the authors.

Code

It is assumed that a single person will be responsible for writing a particular component of the code. As each component will vary in complexity the marks that can be earned are given in the relevant table below.

Student Names	Huseyin Sert	Dan Steer	Harrison Marcks	Jesse Batt	
----------------------	--------------	-----------	-----------------	------------	--
